april 2023

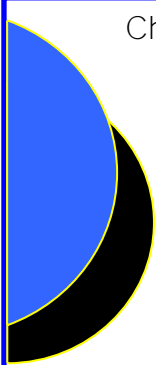

Revolutionary Pluto has now crossed the threshold of futuristic community-minded Aquarius, foreshadowing some exciting and dynamic transformations for humanity.

This process will unfold in stages. The first is the transition stage from March 2023 to November 2024 when Pluto will at times be backtracking through the last stages of Capricorn and crossing back and forth over the first degrees of Aquarius.

When Pluto entered Capricorn in 2008 we witnessed turmoil in the banking sector and financial markets as the global financial crisis took hold. Commentators are now wondering if we are about to see another GFC. Recent bank collapses in the US and Switzerland might lead to good news for mortgage holders here, who are struggling with interest rate payments. Now that Pluto is at the end of Capricorn we are seeing a cycle of death and rebirth within corporate, government and financial sectors. Corporate greed, government corruption, waste, pollution, toxic chemicals, cost of living pressures, taxation, spiralling debt and other issues associated with the symbolism of Pluto in Capricorn, are once again in the news. The bottom line is that we have to clean up our act **and start living within our means. You can't continue to grow the economy within the systems we have been using, when we live on a finite planet.** Pluto in Aquarius is seeing breakthroughs in technology like AI, and clean renewable energy, but it also speaks to the shared resources of our living planet that have to be preserved and managed with the future of eco-systems, animal life and humanity in mind.

LIBRA Full Moon

Chiron is very close to the Sun, and therefore opposite the Moon, fostering conscious awareness of our ingrained patterns and habits. This Full Moon highlights the process of emotional healing and represents an opportunity to work through any issues requiring deep-seated attention.

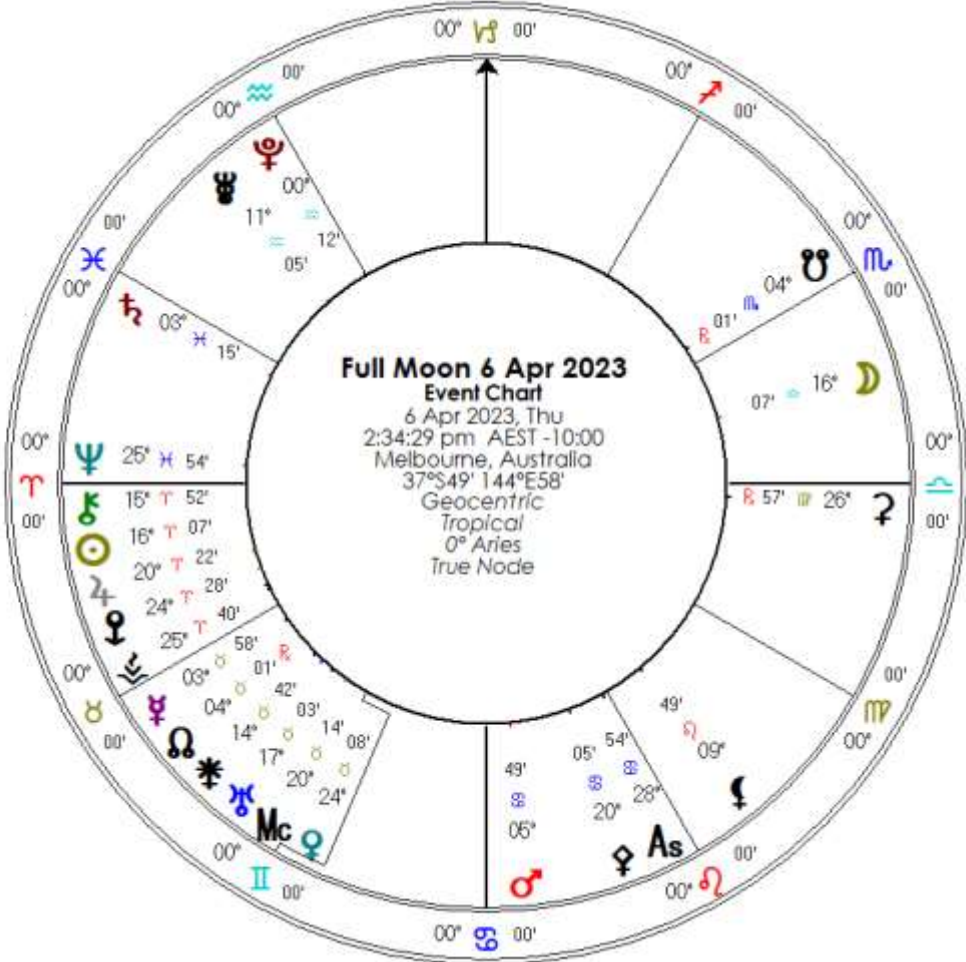

cycle when it is joined by the Sun, so confidence ramping up.

Mercury and the North Node are in close proximity, facilitating channels of communication between the conscious mind and unconscious mind. This sets up a dialogue with others who share our values and experiences. Talking things over provides additional healing.

In the myth, Chiron was abandoned by both his parents. He was later accidentally wounded and this wound never healed. Chiron teaches us self acceptance. No matter our circumstances we have **something to offer**. Chiron's aspects at this Full Moon provide us with tremendous insight into our personal wounds and how we can consciously overcome negative patterns and traumatic experiences that may have impacted our physical and mental wellbeing.

Vesta and Eris are closely aligned providing further insight into our behaviour, especially any acts of revenge that stem from being overlooked. Jupiter is nearby and about to commence a new synodic

CHARTS IN THE NEWS

ANTHONY ALBANESE

The Prime Minister celebrated his 60th birthday recently. I thought we should look at the immense transits that are active in his life right now.

Albanese was born with a Sun-Chiron conjunction opposite Pluto, a powerful and intense combination that suggests a depth of understanding from having had wounding experiences.

As we don't have a time of birth for our PM, I use this noon chart. His Moon will be either in Gemini or in Taurus. (I think it's more likely he was born earlier in the day with a Taurus Moon.)

His Solar return for his 60th birthday in early

March this year has both Hygiea and Pluto sitting tightly on his South Node and his Venus. This suggests he is under intense pressure. Transiting Pluto will back track over his Nodal Axis, but does not quite reach his Venus for another hit. It's close enough though, and likely to continue to keep the pressure on for sometime to come.

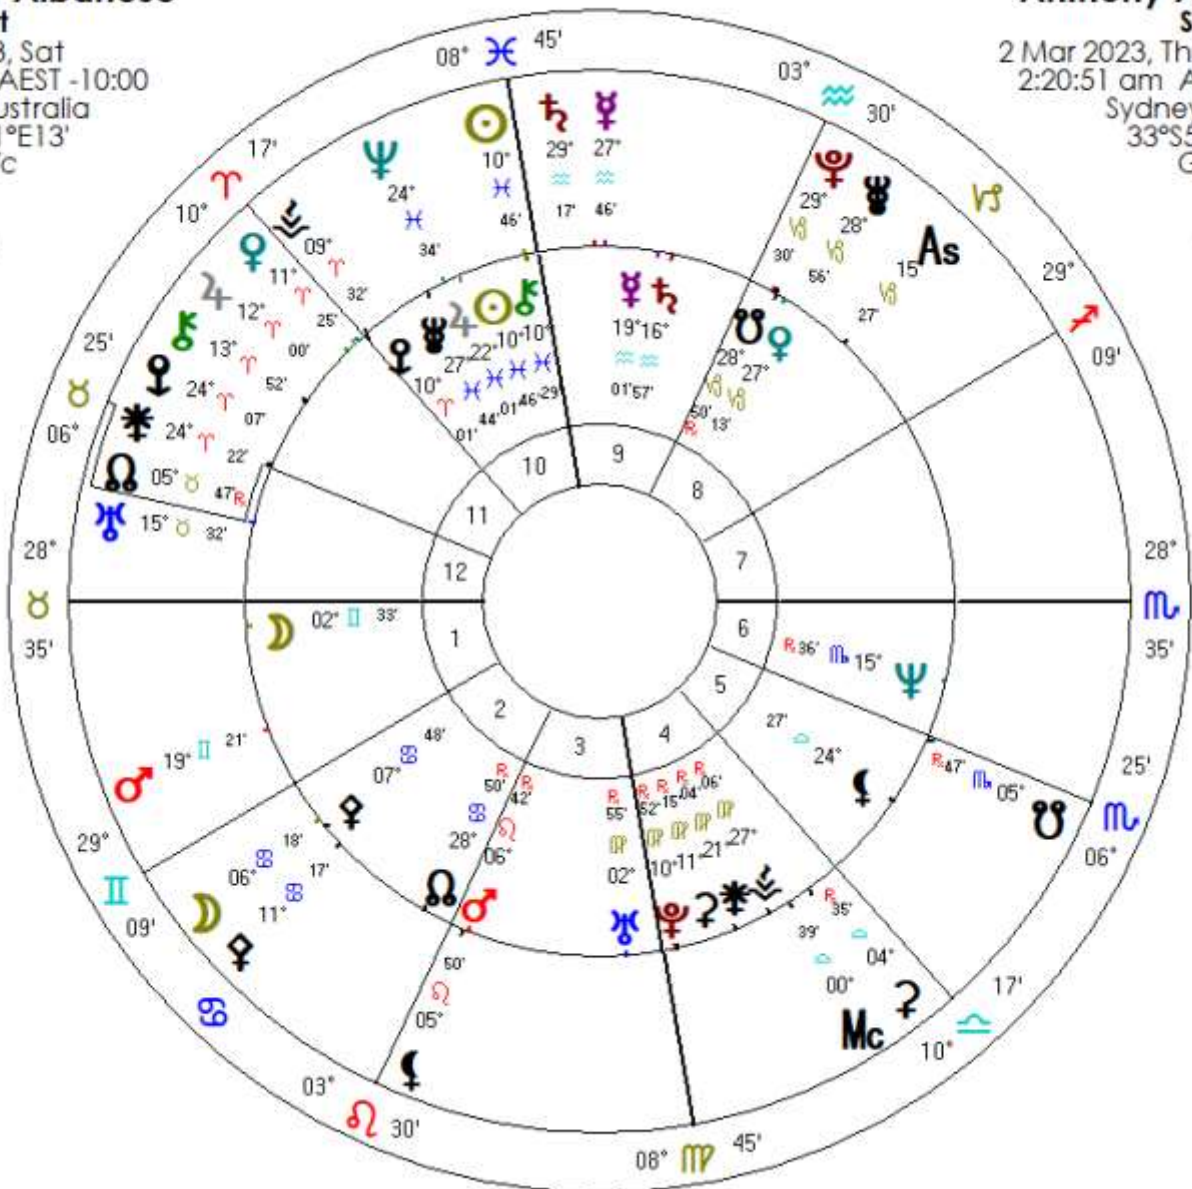

Stressful aspects are also being generated by transiting Uranus which is squaring his Saturn-Mercury conjunction.

Meanwhile, transiting Saturn, having just moved into Pisces, will connect with his Sun-Chiron in 2024, so the tension is likely to continue to increase along with his responsibilities.

So far he seems to be managing things pretty well but it will be vital to look after his health and well-being.

This New Moon is a hybrid Eclipses provide opportunities to Solar eclipse. The eclipse expand consciousness. This is especially true of this powerful eclipse. path crosses Australia's North West Cape.

Mercury stations retrograde on the 21st at 15TA37 in the middle of fixed signs, where it will be difficult forging a tight square to make changes. This is arguably with Pluto. This fore- the most steadfast point in the shadows the significant challenges tire zodiac. But Mercury is a shapeshifter and he is asking us to global issues and a rapidly changing future.

There are entrenched opinions, personalities and systems very determined to maintain the status quo. But this push to change suggests sudden events and this could trigger unexpected eruptions, earthquakes or accidents.

Whether we use astrology or other means, these events are impossible to predict, but as the eclipse path crosses a few regions that are highly sensitive to seismic events, the potential for earthquakes in these areas is elevated. See page 8 for more details...

This book details my research into the 32-year cycle of Venus and Mars.

The symbolic connection between the celestial lovers is mirrored by their interaction as metals copper (Venus) and iron (Mars). This passionate exchange creates life on this planet and has immense impact across social settings and generations.

APRIL'S SOLAR ECLIPSE

This month's Solar Eclipse is part of Saros cycle 129 (Brady 7 North).

The first eclipse in this series was in the year 1103 and significantly it was opposing Pluto. So both the chart for this current eclipse and the original chart in 1103 amplify the power of transformative Pluto.

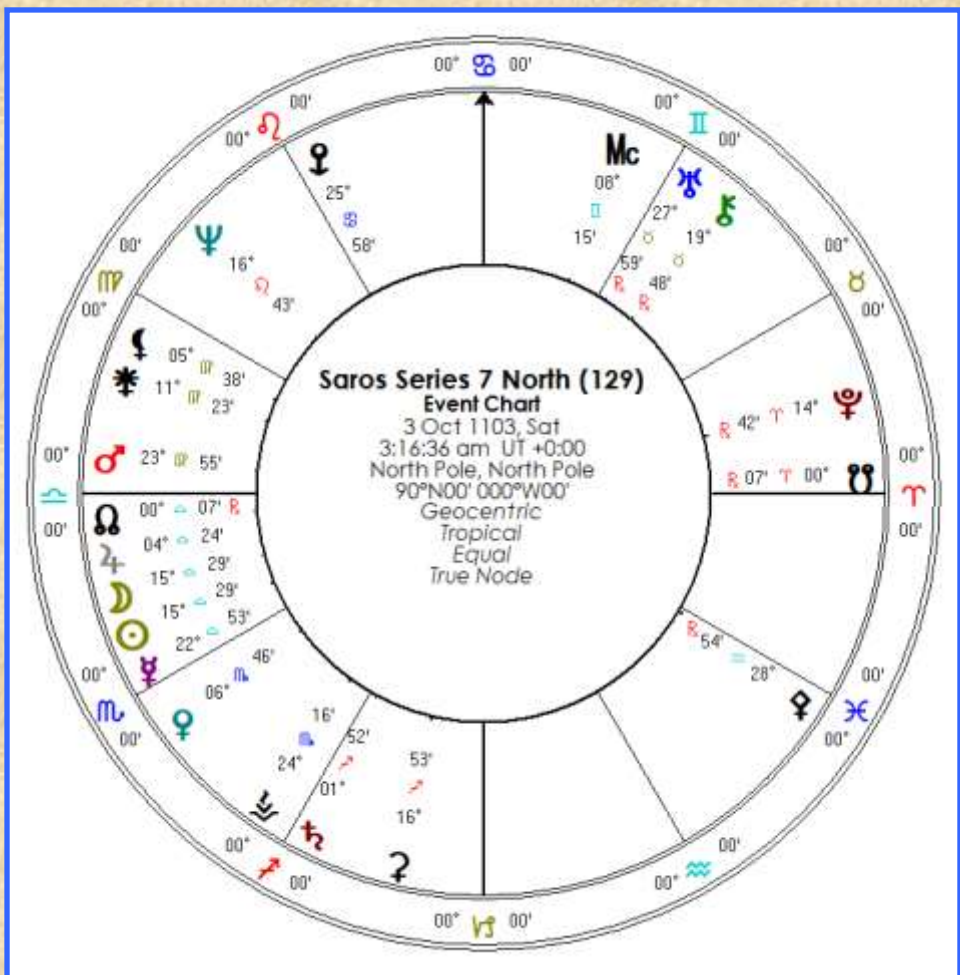

Pluto can be destructive, but it also engenders a process of rebirth.

The Sabian Symbol for 16 Libra, the degree of this eclipse, is "A boat landing washed away". Earthquakes are very difficult, if not impossible to predict, but the potential for some kind of event is suggested by these two charts.

Time and Date explain a hybrid eclipse...

"During a hybrid solar eclipse, the Earth's curvature brings some sections of the eclipse path into the Moon's umbra, the darkest part of its shadow that creates total solar eclipses, while other areas remain outside the umbra's reach, causing an annular eclipse."
